25X1 MEMORANDUM FOR: [REDACTED]  
Office of Sigint Operations

25X1 FROM : [REDACTED]  
Chief, B Division, ODP

VIA : Clifford D. May, Jr.  
Director of Data Processing

SUBJECT : ODP and OC Comments on the Draft Pilot  
Baseline ELINT Data Flow Study

25X1 1. Upon my inquiry, [REDACTED] of IRO/RMS confirmed that the Study excluded discussion of TELINT analysis activities. ODP/Applications support to other than TELINT activities is not sufficiently significant to warrant incorporation into the Study. David also stated that the paragraphs marked "Not This Issue" did not now require comment. As such, we have no additions or modifications at this time. [REDACTED] Chief, Systems Integration Staff, Engineering Division/OC, speaking for OC, had no comments as the Study is not applicable to their present activities.

2. ODP/Applications found the Study to be of value as it identifies Intelligence Community components that may possess useful solutions (computer programs, etc.) to problems posed to ODP. We appreciate the effort required to produce this paper and hope that ODP may receive a copy as the Study proceeds through subsequent editions.
